Continuation of 5. does NOT place the application in condition for allowance because: The Applicant's arguments are not persuasive. With respect to Applicant's arguments that the present claims disclose means for changing the appearance of controls which is not disclosed in Rock. Rock discloses that the focus features allows for the appearance of the displayed controls to be changed, wherein the appearance of the controls will change in a distinct manner based on if it is focused in or not. The present claims do not state a specific functionality or operative state as is stated in the arguments. The claims are directed towards the control being active and focused, wherein it is clear and inherent that whether based on pointer location, if the control is focused then it is active, as opposed to when the control is not focused and therefore not active. The term active is general and can be interpreted in various ways, wherein there is no clear reference to a distinct functionality or operation of the controls in the present claims.
